Root Elevator "KOPP"

A distinct elevator having a sharp edged helical groove on the tip ensuring an easier penetration between the tooth and the alveolus. A safe and fast extraction of the root is obtained through moderate pressure and smooth rotation of the elevator.

Fragment's Extractors

Manual extractors for root fragments

For the easy and safe extraction of apical fragments, leaving the alveolus left undamaged compared to the use of traditional root elevators and forceps. The minimal rotation of the self-tapping screw ensures a firm grip. For total safety fasten the extractor to the finger with floss.

Intraligamental Syringes

Advantage of Intraligamental Anaesthesia

- Automatic limitation of the power pressure.
- Anesthetising of a single tooth.
- No numbness of the tongue, lips or cheek.
- Supports regional block anesthesia.
- Simultaneous treatment of teeth in different quadrants.
- Eliminates the risk of haematoma.
- Lower emotional impact on patient.

Suitable for uppers and lowers, just turn the front barrel

As opposed to a classical infiltration or block anesthesia, this method injects the local anesthesia directly into the dental ligament (periodontal ligament) and thus guarantees a rapid, profound and total anesthesia of a single tooth.

Aluminium – Orange – 1.8 ml

Syringes for Intraligamental Anaesthesia

The intraligament anaesthesia technique is used for the treatment of individual teeth by means of an injection between the alveolar crest and the tooth root. With this technique the needle is inserted through the gingival sulcus into the periodontal space along the mesial or distal surface of the tooth: the anaesthetic solution must be injected slowly keeping a constant and moderate pressure to facilitate the distribution of the liquid. Contraindicated in presence of deep periodontal pockets and gingival acute infection.

Aspirating Syringes

Excellent quality and unmatched reliability characterise Medigold Surgical's range of syringes. In order to satisfy the different needs, the majority of their syringes are equipped with double tip: one suitable for European / METRIC thread needles (EU) and one for American / IMPERIAL thread needles (AM). On demand some of our syringes can also be equipped with an aspiration arrowhead tip.

Gracey Curettes

Gracey Curette Comparison

STANDARD GRACEY

Using a special new steel alloy MEDIGOLD has managed to create a superior curette with even sharper edges.

RIGID TYPE GRACEY

Has a thicker and less flexible shank than the standard Gracey. It can be used for treatments usually performed with a scaler.

LONG TYPE GRACEY

Has a longer shank, 3mm longer than the standard Gracey and allows deep reaching into the periodontal pockets.

SHORT TYPE GRACEY

Same as the long type except for the cutting end, which is shorter to allow easier sub-gingival insertion into periodontal pockets.

Standard Gracey

Crown Remover Kit

Crown Instruments

Crown Instruments

Endodontics Pluggers

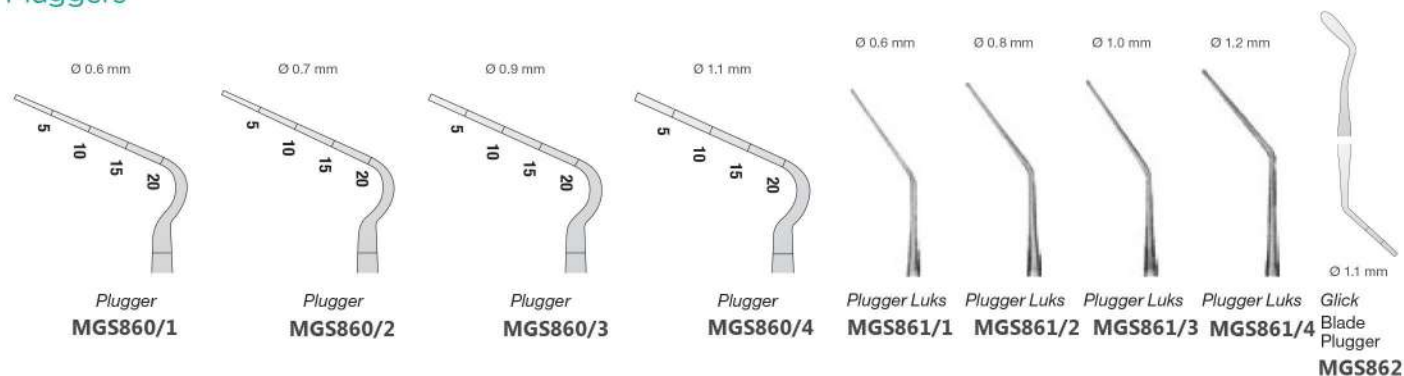

Pluggers are recognisable by their flat tip, available in different diameters, its main function is that of vertically plugging and condensing the gutta percha into the endodontic canal.

Spreaders

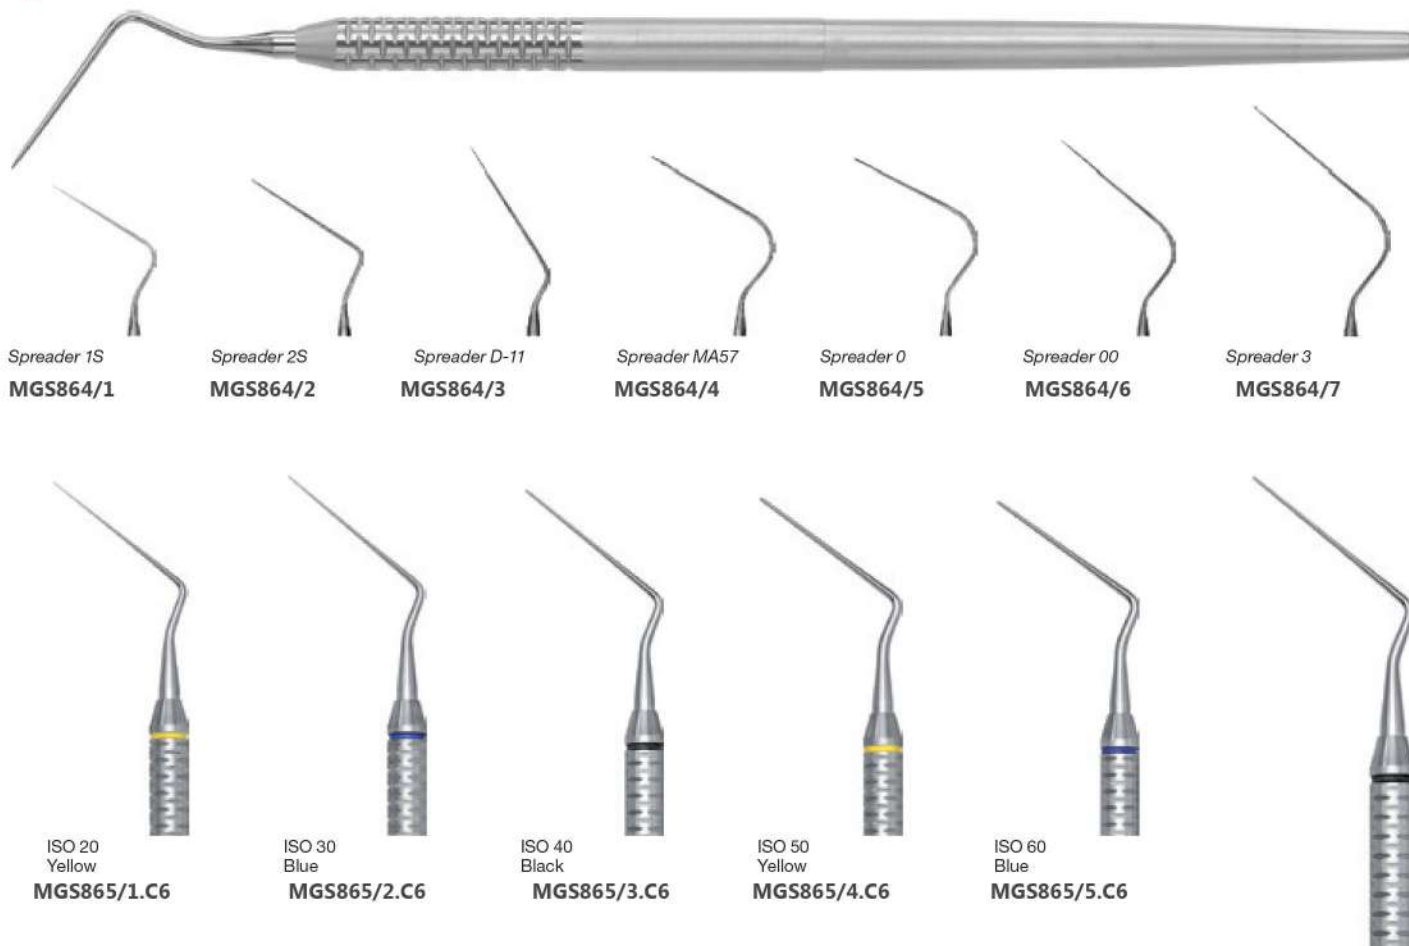

Spreaders are recognisable by their pointed tip and their stem, which is bent in many different tangents. The spreader is mostly used for the following applications: **Cold working** to laterally compact the gutta percha into the endodontic canal; **Heat carrier** to carry the heat into the endodontic canal through a previously heated tip.

Endodontics
Pluggers

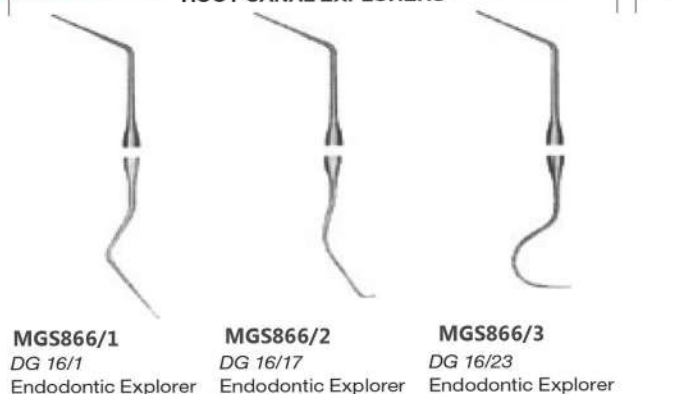

Spreaders

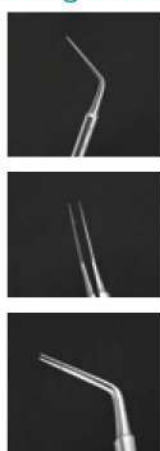

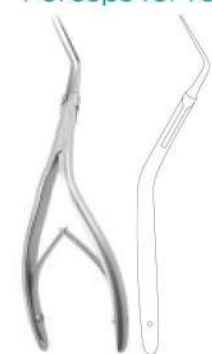

Endodontics

ROOT CANAL EXPLORERS

Forceps for removing broken instruments

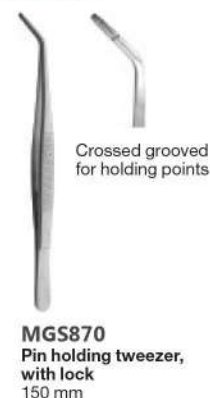

The thin and long tips bent at 60° against the handle enable the instrument to be introduced deeply into the root canal. The total length of the tips is 20 mm with a diameter of 0.8 mm.

The forceps have been equipped with a special set of serrated edges positioned at an acute angle, which enables a firm seizing of a broken instrument, or a silver pin in the root canal. The total length of the serrated working part is 5 mm.

The internal pin prevents the side slipping of the tips.

Distal End Cutters

Wire Cutters - Pins and Ligature Cutters

MGS928/TC
Ø max 0.3 mm
120 mm

Delicate cutter, specially designed for the removal of soft stainless steel ligatures.

MGS929/TC
Ø max 0.3 mm
125 mm

Delicate cutter with a fine tip for easier access to difficult areas. Cut elastics, ligatures, pins and wire.

MGS930/TC
Ø max 0.5 mm
130 mm

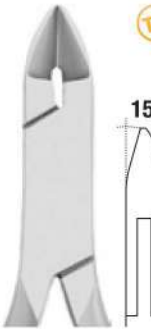

Medium cutter ensuring accurate and precision cutting of elastics, ligatures, pins and wire.

MGS931/TC
Ø max 0.3 mm
130 mm

Standard cutter with slim profile, allowing an easy access and better view of the oral cavity.

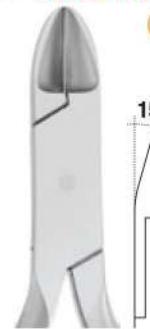

MGS932/TC
Angled 15°
Ø max 0.3 mm
130 mm

Same as 85TC, but with a 15° offset tip enhancing a better access in difficult areas

Wire Cutters - Hard Wire Cutters

MGS933/TC
Ø max 0.5 mm
130 mm

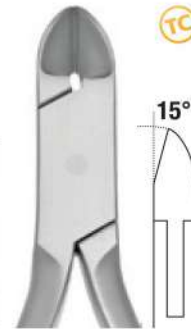

Medium cutter with rounded and slim tip. 15° offset tips help in posterior area.

MGS934/TC
Ø max 0.7 mm
130 mm

Suitable for cutting archwires or pins of any size. TC inserts ensuring longer duration.

MGS935/TC
Ø max 0.7 mm
130 mm

Same as 87TC, but with a 15° offset tip enhancing a better access in difficult areas

Wire Cutters - Hard Steel

MGS936/TC
Ø max 1.0 mm
140 mm

For front cutting of heavy wires.

MGS937/TC
Ø max 1.0 mm
155 mm

For an easy cutting of any size of archwire or pin. 15° offset tips for an easier access to the posterior area.

MGS938/TC
Ø max 1.2 mm
160 mm

Triple action system for heavy wires, reduce effort on cutting.

Utility Pliers

MGS939
Weingart
Ø max 0.5 mm
140 mm

Versatile utility plier with very fine serration.

MGS940
Weingart - Slim
Ø max 0.5 mm
145 mm

Weingart with fine points.

MGS941/TC
Weingart - Angled
Ø max 0.5 mm
140 mm

Weingart with TC tips, indicated also for placement and removal of archwires, because of the tapered angular design.

MGS942
How plier - Straight
Ø max 0.7 mm
140 mm

Utility plier with round and serrated tips. Ideal for removal and placement of the archwires. Grasping all types of auxiliaries attachments.

MGS943
How plier - Angled
Ø max 0.7 mm
140 mm

45° angled tips for convenient access to lingual and others difficult posteriors areas.

Wire Bending Pliers

MGS944
Adams
Ø max 0.4 mm
125 mm

Squared beaks, clasp and wire bending plier.

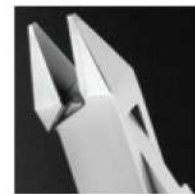

MGS945/TC
Adams
Ø max 0.4 mm
125 mm

Squared beaks, clasp and wire bending plier, TC inserts.

MGS946/TC
N.64
Ø max 0.7 mm
140 mm

Squared beaks, heavy type, TC inserts.

MGS947/TC
Angle N.139
Ø max 0.7 mm
125 mm

Bird beak plier, cone and pyramidal tips in TC. Indicated for loops and general bending of round wires.

MGS948/TC
Angle N.138
Ø max 0.7 mm
125 mm

Long bird beaks for light wire. TC inserts.

MGS949/TC
Ø max 0.7 mm
130 mm

4 grooved bird beaks used to form precise loops in round, squared or rectangular light wire.

Wire Bending Pliers

MGS950
Tweed
With cutter
Ø max 0.4 mm
135 mm

Ideal with round and square wire, for making consistent uniform loops. Section tips 1.2-1.8-2.0 mm.

MGS951
With cutter
Ø max 0.6 mm
130 mm

Light wire cutting and contouring plier. For round wire, to bend small Ø loops. Contouring of loops and arches up to 0.55 x 0.64 mm.

MGS952
Angle
With cutter
Ø max 0.5 mm
130 mm

Bird beak with cutter and TC inserts.

MGS953
Aderer – Short
Ø max 0.6 mm
120 mm

3 jaw plier – Short. Lightly rounded tips, for contouring and bending without damaging the archwire.

MGS954
Aderer – Long
Ø max 0.7 mm
130 mm

3 jaw plier – Long. Lightly rounded tips, for contouring and bending without damaging the archwire.

MGS955
Jarabak
Ø max 0.7 mm
140 mm

Light wire bending plier. Versatile in different uses, as bending or closing loops. One beak partially serrated for safe grip.

MGS956
Tweed – Short
Ø max 0.5 mm
125 mm

Arch forming plier – Short. Ideal for torquing and bending squared or rectangular wire. Parallel blades prevents crushing of wires.

MGS957
Tweed – Long
Ø max 0.7 mm
130 mm

Arch forming plier – Long. As 3000/51 but for bigger wires size.

MGS958
Schwarz
Ø max 0.7 mm
130 mm

Arrow clasp bending plier.

MGS959
De La Rosa
Ø max 0.5 mm
125 mm

Contours and forms archwires, of light wire without torquing.

MGS960
De La Rosa
Ø max 0.5 mm
125 mm

Same as 3000/34 with additional grooves measuring respectively 0.41-0.46-0.56 mm.

MGS961
Ø max 0.7 mm
125 mm

Lingual arch forming plier for fast forming all lingual retainers.

Wire Bending Pliers

MGS962

Tweed – Short
Ø max 0.5 mm
135 mm

Designed to form precise omega loops. Long grooved beak internally smoothed. Short type.

MGS963

Tweed – Short
Ø max 0.5 mm
135 mm

Designed to form precise omega loops. Short grooved beak internally serrated. Short type.

MGS964

Young
Ø max 0.7 mm
130 mm

Ideal for labial arches and face bow. Universal plier for different size loops.

MGS965

Tweed – Long
Ø max 0.5 mm
145 mm

Designed to form precise omega loops. Long grooved beak internally smoothed. Long type.

MGS966

Tweed – Long
Ø max 0.5 mm
145 mm

Designed to form precise omega loops. Long grooved beak internally serrated. Long type.

MGS967

Tweed – O'Brien
Ø max 0.7 mm
140 mm

Graduated cone to form precise omega and closing loops. Micro serrated beaks to prevent wire slippage.

MGS968

Optical
Ø max 0.7 mm
140 mm

Concave/convex loop forming plier, small-medium.

MGS969

Optical
Ø max 0.5 mm
135 mm

Concave/convex loop forming plier, medium-large.

MGS970

Hollow Chop
Ø max 0.8 mm
140 mm

Contours and form arches of all sizes.

MGS971

Ø max 0.7 mm
135 mm

Long and delicate beaks plier.

MGS972

Ø max 0.6 mm
140 mm

2 round beaks long.

MGS973

Ø max 0.7 mm
125 mm

2 round beaks short.

Wire Bending Pliers

MGS974

Nance
Ø max 0.7 mm
130 mm

MGS975

Cinch Back
Ø max 0.7 mm
155 mm

Loop bending plier.
Four step tips (3, 4, 5, 6 mm) for loops forming.
Round and rectangular wire.

Cinch back utility plier.
For closing arches or cinch down a wire. Use on round or rectangular wire.

MGS976

Ø max 0.5 mm
140 mm

Closing loop plier.
Different loops in only one plier.

MGS977

Ø max 1.4mm
130 mm

3 prong plier. For hard wires. Round tips prevents any damage of archwire.

MGS978

Nance
Ø max 0.7 mm
135 mm

Loop closing plier.
For bending of stop loops and ideal for Adams clasps.

MGS979

Johnson
135 mm

Crown and band contouring plier.

MGS980

Reynolds
130 mm

Crown and band contouring plier.

MGS981

Schwarz
Ø max 0.7 mm
125 mm

Arrow clasp bending plier.

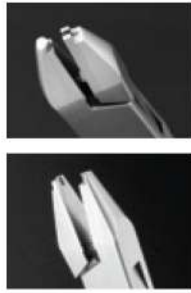

Bracket Pliers

Pliers to remove the brackets: the extremely sharp tips allow an easy access under the flange of the bracket and facilitate its detachment.

MGS982
For ball hooks and auxiliaries
Crimpable archwire hook
130 mm

MGS983
Bracket remover –
Straight
